FINANCIAL OPINION:

A Thursday Illustrated Financial, Political, Literary, and Family Paper.

FINANCIAL OPINION, in addition to first-class original matter on all subjects of immediate interest, is devoted to the collection, analysis, and presentation of the most exhaustive information on Financial Matters, and gives the cream of the rival opinions contained in the leading Journals and City Articles, both British, Colonial, and Foreign. Men of business are rarely able to analyse carefully all the rival opinions on any particular security day by day, and week by week, smothered as they are in the sea of general materials throughout all the papers. FINANCIAL OPINION, devoted among other purposes to this, undertakes to provide the man of business and the investor with such a digest and comparison, stripped of all fortuitous and irrelevant matter, and presented in a form intelligible to every man of common sense. The leading securities of the day are from time to time illustrated by charts of the fluctuations in price, in some cases for a series of years, and regularly for a series of two to three weeks. Besides the Diagrams of Price Fluctuations, various Maps of the Seat of War are frequently given.

"MR. STANLEY'S VOLUMES contain the ac-
count of attempts to solve successfully and for ever the
three greatest problems of African Geography—which are
the true head fountains of the Nile, what the extent and
feeders of the great lakes Victoria Nyanza and Tanganika,
and what the actual course of the great river which
Livingstone and Cameron had alike seen rushing past them
at Nangwe.....The work in each attempt was admirably
done, and in the two latter cases most completely."
Graphic.

STANLEY'S BOOK.—GRAPHIC.—"There is some-

STANLEY'S BOOK.—SCOTSMAN.—"In a record of ex-
ploration extending over nearly three years, spent in great
part in regions where no white man had before set his foot,
we look naturally for abundance of incident and adventure;
for an introduction to totally new aspects of nature; for a
revelation of modes of life hitherto unheard of. In all these
respects 'Through the Dark Continent' should satisfy the
most exacting."
Scotsman.

STANLEY'S BOOK.—NATURE.—"Let us at once
assure those of our readers who may cherish the idea that,
after having read Mr. Stanley's letters in the *Telegraph*,
they need not trouble themselves with his book, that they
labour under a delusion. Compared with the book, the
letters are a mere prospectus.....Mr. Stanley has done a
great work, and told us about it in a great book."

STRENGTH FOR THE WEAK.

THE latest addition to Therapeutics is the discovery of a NEW COMPOUND SALT, having two distinct bases. This valuable aid to medicine, if dissolved in hot water, forms a most invigorating lotion, quickly curing Weaknesses, arising from whatever cause, and drawing out pains and aches, and is known as

LIEBIG'S SILVER SALT.

The feeble and those in delicate health will find this Salt highly invigorating and exhilarating, which all who suffer from Colds and Weaknesses will at once appreciate, as it fortifies any weak part bathed with it, thereby preventing and keeping off Colds, by giving a warm glow of health, and should always be at hand for use in changeable weather, to rub in any part as a protection.

LIEBIG'S PEARLS OF STRENGTH

are perfectly tasteless, being prepared in the form of Pearls, which they resemble in appearance. This elegant medicine is quite different to anything ever brought before the public, containing, in a cheap and pleasant form, a most elaborate preparation, adapted to all ages and constitutions, for

**ENRICHING THE BLOOD,
and for the permanent cure of**

General Weakness, Nervous Prostration,
Shortness of Breath, Palpitation of the Heart,
Impoverished Blood, Pains in the Back,
Noises in the Head and Ears, Bilious and Liver Complaints,
Impaired Sight and Memory, Weakness of the Chest,
Indigestion, Melancholy,
Incapacity for Study or Business, Trembling of the Hands and
Limb, Dizziness, Neuralgia,
Rheumatism and Pains and Want of Energy and Loss of
Aches, Appetite,
and most other symptoms of failing health.

TESTIMONIAL from Sir CHARLES LOCOCK,
Physician to the Queen:—

"I have seen the effects of Liebig's Pearls of Strength, and regard them favourably as a general family medicine, pleasant to take, and beneficial in their action. I have also subjected the Silver Salt to some very severe tests, and find that the hot solution draws out pains and aches in a few minutes, and is without doubt the most powerful invigorator known, and these two remedies appear to me to fully bear out all that is claimed for them.

"CHARLES LOCOCK, M.D."

In cases of physical, functional, or organic weakness, the Silver Salt will soon effect a cure, if applied as a lotion to the place, causing the blood to flow there, and the part then becomes strong; and these two remedies comprise the whole of the LIEBIG SYSTEM OF MEDICINE, of supplying the blood with its ferruginous, phosphatic, and saline elements, for curing languor, exhaustion, and early decay, by rendering the blood sufficiently rich to nourish the body, expel all impurities, infuse new life, and build up a stronger constitution, and has so far proved a success that it is rapidly superseding the old system.

These PEARLS are sold in boxes at 1s. 1½d., 2s. 9d., 4s. 6d., 11s., 22s., and 33s., and the SILVER SALT is the same price. There is a considerable saving in buying the larger quantities, and they can be forwarded to any part, carriage free, with printed directions for use.

OPINIONS OF THE PRESS.

SPECTATOR.

"The movement for the Endowment of Research is no longer the impracticable crusade which it appeared to be twelve months ago. The activity of its promoters, and the unexpected sympathy which it has inspired in official quarters, have enabled it to make its way into the arena of practical politics. In the struggle which is being carried on as to University reform, it is one of the forces which must be calculated for, and it is therefore extremely important that we should understand its direction and its aim. The volume before us throws welcome light upon much that was before vague or enigmatical in the programme of the new party."

WORLD.

"In the speech in which he introduced the Oxford Reform Bill, Lord Salisbury made himself the mouthpiece of the authors of *Essays in aid of the Endowment of Research*."

SATURDAY REVIEW.

"It is, then, a little remarkable that not one of them has even attempted to grapple with the real difficulties of the question."

ATHENAEUM.

"It is something, however, to have pointed out the want, and to have promoted its public recognition. We may now look confidently for future improvement to a set of opinion which has already far outrun the most sanguine anticipations of those who, when they originally appealed to it, did so with scarcely a hope of immediate success."

EXAMINER.

"The object of these essays is to expound a new conception of the proper employment of University endowments; or rather, as the writers seem disposed to put it, to recal men's minds to an old conception which has fallen into neglect."

ACADEMY.

"These essays, which are all written by advocates of what is called Endowment of Research in the Universities, will help to remove many false impressions on that subject. It will be clear from them that all that has been found to be good and useful at Oxford and Cambridge may remain undisturbed, and that there are ample resources to add to it all that the most ardent reformers can desire. The idea of changing the English into German Universities, of suppressing the College system, of substituting professorial for tutorial teaching, is not even mooted in any of these Essays. They are all occupied with the question how the present system of University education can be rendered more efficient, and how, by the side of it, or in the midst of it, all that is good in the German Universities, and much that even German Universities have not hitherto attempted, may be superadded."

MACMILLAN'S MAGAZINE.

"This volume of *Essays* pleads for the general recognition of principles which would aim at making our Universities the homes of more men like Professor Max Müller. . . . It is not urged that academical revenues should be devoted to that purpose exclusively."

LITERARY CHURCHMAN.

"This remarkable volume is the outward sign of an unmistakeable 'set' which ideas are taking in our generation; and it is, moreover, the proof that scientific studies have entered upon a new phase. . . . It is certainly an astonishing volume."

ECHO.

"This volume contains the best information extant on a subject which, although of national importance, is as yet but imperfectly understood by the general public."

GLOBE.

"The present volume is a thoughtful contribution to the discussion of the subject."

TIMES.

"It is an injustice to an essay so brilliant and so suggestive as Mr. Pattison's to present it to our readers in the above brief and imperfect summary. It deserves the careful attention of all who are interested in the question of University organisation and reform. There can be no doubt that the question raised by Mr. Pattison in his concluding words will have to be discussed, and in some manner settled by the new Oxford Commissioners."

PALL MALL GAZETTE.

"Several of the earlier essays are of value in clearing the ground of the question. In particular, Mr. Cotton's essay on the intentions of the founders of fellowships is well worth study. . . . Dr. Appleton shows quite conclusively that the Endowment of Education is economically unsound in principle, and with great plausibility that the Endowment of Research is economically sound. . . . Assuming, as it is safe to assume, that some considerable reduction of the number of fellowships will take place, the question arises, What is to be done with the money? and the extreme difficulty of suggesting any more satisfactory answer than that offered by the advocates of the Endowment of Research gives the real strength to their proposals."

STANDARD.

"All our sympathies are with Mr. Pattison and his friends."

NATURE.

"Widely as we should wish to see this book read amongst the laymen of science, the Philistines and those who prophesy to them, politicians and practical reformers, it will certainly be found quite as valuable as by any of these by men of science. Men of science will find in the present volume data and suggestions which should aid them greatly, at this critical moment, to determine what they will urge upon the Government, as the fit relationship between the State and scientific research. . . . The eminence and competency of the writers give it an overwhelming force of authority and reason."
